Crystal
MOON

Crystal MOON

Un decorativo pronto all'uso,
composto da microsfere di vetro
e cariche perlescenti.

Come nella superficie lunare,
le tinte Crystal MOON riflettono la luce circostante,
le pareti si animano d'improvviso,
tra riflessi vitrei e opacità cangianti
lievemente materiche.

A refined decorative
composed of glass microspheres
and iridescent fillers.

As on the lunar surface,
Crystal MOON nuance reflects the surrounding
lights, the ambience suddenly comes alive,
with slight materic opacities
and glazed reflections.
